A guide to gating

To make it easy for you to control your choices, we've developed a feature called gating. We've split a wide range of investments and asset types into different levels – or gates.

Each gate provides you with an increased level of access, opening more sophisticated products and investment options. You can move into any gate up to Gate 3. Gate 4 is restricted, and you can only access this through a financial adviser due to the complex nature of the investments available. If you're in Gate 4 you can sell investments but you'll not be able to buy any Gate 4 investments without your financial adviser.

You can move up a gate but you can't move back down.

Within the platform we have different product wrappers which sit within each gate. The higher the gate, the more complex the product wrapper and this opens up your choice to more complex investment funds.

You can choose to invest in any gate, whatever product wrapper you're invested in. For example, if you have a workplace pension, you can still choose to invest in Gate 3 if you would like more options for your investments.

Gating only restricts the buying of investments you have access to, so you can always sell investments from a higher gate.

The value of investments can fall as well as rise, isn't guaranteed and you could get back less than you invest.

If you're not sure which gate is right for you, please speak to a financial adviser. If you don't have a financial adviser, you can visit [MoneyHelper](#) to find the right one for you.

What's in each gate?

The table below highlights what is available within each gate:
